CAREER OBJECTIVES

AI Master's student at Central University of South Bihar with a strong foundation in Python,Machine Learning,Deep Learning and Linux. Seeking to leverage hands-on research experience to drive innovation as a [Job Title] at [Company Name].

EDUCATION

2025-present	Master of Science in Artificial Intelligence. Relevant coursework:Deep Learning,Machine Learning,Social Network Analytics,Python,Software Engineering,Big Data Analytics	Central University of South Bihar,Gaya
2021-2024	Bachelor of Computer Applications. Gaya College,Gaya	Magadh University,Gaya

PROJECTS

Python, Flask, Flask-CORS, Requests, dotenv, OpenWeatherMap	WeatherWise - Finalized the development of a full-stack weather dashboard with real-time weather data, GPS-based location detection, and 5-day forecasting - Integrated OpenWeatherMap APIs and implemented caching and retry logic, and responsive data visualization with Chart.js. - Developed a modern Flask-powered web application with location search, weather analytics, and user preference management.	Repo Link
Technology	RoxxByte - Built and maintained a technical blog as a static site, using Zola with automated deployment and repository mirroring workflows. - Implemented multilingual content management, search indexing, RSS feeds, and analytics integration. - Customized and extended the Duckquill theme to provide a streamlined developer-focused publishing work	Repo Link
Technology	Forge - Built my own arch linux binary package repo served from github pages for easy pacman install of some packages. - Set up CI/CD pipelines using github actions to automatically deploy the repo on commits, and using git LFS to store the binary packages (pkg.tar.zst) - Curated and maintained a diverse collection of packages (including AI frameworks and desktop environments), demonstrating proficiency in Linux system administration, shell scripting, and dependency management.	github.com/link
Technology	My project 2 Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis.	github.com/link

SKILLS

Languages: Python, SQL, C, C++

Frameworks & Libraries: PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy, Flask, FastAPI, FastAPI

Cloud & DevOps:	Docker, GitHub Actions, GitLab CI
Databases:	MySQL
Tools:	Linux, Git, Bash, GitHub, Codeberg, Jupyter, Postman
Concepts:	Machine Learning, Deep Learning, NLP, Computer Vision, Reinforcement Learning, Data Structures & Algorithms
